RE: Junior Software Developer, Scoutahead

Dear Mr. Raj Fernando,

In my 10+ years of work experience in European Grant Management and NGO projects I've enjoyed finding technical solutions to problems and I've been on a constant path of acquiring knowledge and experience on technologies that impact people's lives.

As a junior web developer, I am ready to use my skills that I've built during my Dev Bootcamp program and I'm excited about building code and learning at Scoutahead because I believe it is a great product for enterprise communications and I want to grow in a young and growing company.

I'd like to discuss how my skills align with your junior software developer opportunity within an interview. I'm looking forward to speaking with you soon.

Sincerely,

Anca Fodor Ciascaiu
